

EQUINE PATHWAYS AUSTRALIA

SOUTH AUSTRALIA

Equine Pathways Australia is a Not For Profit organisation specialising in equestrian training for people living with physical disability. The cornerstone of our program is the 2-day weekend clinics across a number of states with participants engaging in on-horse sessions with our specialist team of coaches, and off-horse sessions with a variety of allied health providers including physios, sport psychologists, occupational therapists and exercise physiologists. The clinics focus on each participants' goals and ambitions whether they be in recreation, vocation or high performance areas. We are proud of what our program provides, supporting our participants to achieve their goals.
